

SudburyROCKS!!! Race, Run, or Walk for Diabetes
Presented by Ionic Engineering

If your goal is to be the first to cross the finish line, go for it!

But if all you want to do is participate in an event that helps change the lives of the millions of Canadians living with diabetes, take your time. Walk or run... it's up to you!

The key is to have fun and make it across the finish line.
All you have to do is show up with the will and determination to make a difference.

About the Sudbury Rocks Running Club

The Sudbury Rocks Running Club began to take form in 1998 when a small core group started running and training together on a regular basis. By 2000, our numbers had grown considerable and a weekly e-mail newsletter was instituted to provide the latest in running news to the group. By 2002, membership had grown to over 70 members. It then became apparent that a website was necessary if we were going to meet our objective of bringing fitness to more people.

Our mission statement is to “encourage and support the development of public participation in running for fitness, health and enjoyment.”

As many members of the Sudbury Rocks Running Club have family members affected by diabetes, and Diabetes Canada has embraced a proactive approach to keeping people with diabetes healthy, as well as preventing future cases of type 2 diabetes through a variety of programs, including Team Diabetes, the Sudbury Rocks Running Club chose Diabetes Canada as the recipient charity for this event.

About Diabetes Canada

Diabetes Canada works across the country to promote the health of Canadians and eliminate diabetes through a strong nationwide network of volunteers, employees, healthcare professionals, researchers, partners, and supporters.

For more than 60 years, Diabetes Canada has provided leadership in raising the profile of diabetes, improving the lives of those living with the disease, providing essential information to those at risk and accelerating the search for a cure through the funding of world-class research.

With a presence in over 150 communities in Canada, its Public Programs & Services teams deliver innovative, quality programs and services that support, empower and motivate people to adopt healthier lifestyles leading to improved prevention and management of diabetes. Public programs and services include summer camps for children living with type 1 diabetes, community education presentations and expos, as well as educational programs for children and youth.

About Diabetes

Diabetes has reached epidemic proportions:

- 11 million Canadians currently have diabetes or prediabetes.
- That represents almost 1/3 of all Canadians.
- One Canadian is diagnosed with diabetes every 3 minutes.
- 1.5 million Canadians have type 2 diabetes and don't even know it.

Diabetes is serious:

Diabetes is one of the leading causes of death by disease in Canada. In fact, it's in the top 10! If left untreated or improperly managed, diabetes can result in a variety of complications:

- Diabetes is a leading cause of adult blindness and kidney failure
- The risk of stroke doubles after a diagnosis of type 2 diabetes
- Diabetes is the leading cause of limb amputations
- Diabetes shortens lives
- Life expectancy for people with type 1 diabetes may be shortened by as much as 15 years and by as much as 5 to 10 years for people with type 2 diabetes.

Diabetes can be managed:

- People with diabetes can live active, independent, and vital lives if they make a life-long commitment to diabetes management.
- Diabetes management includes:
 - Education
 - Physical activity
 - Nutrition
 - Weight management
 - Lifestyle management
 - Blood pressure management
 - Possibly medication.

Executive Summary

The Sudbury Rocks Running Club and Diabetes Canada entered a partnership in 2004, working together to create the Sun Run for Diabetes. Since then, the two groups have maintained a close relationship, expanding the Sun Run for Diabetes in 2005 into the ***SudburyROCKS!!! Race, Run, or Walk for Diabetes***, Northern Ontario's largest competitive running event.

The ***SudburyROCKS!!! Race, Run, or Walk for Diabetes presented by Ionic Engineering*** offers a challenge not only to Sudbury residents, but to everyone. The marathon is a Boston Qualifier, and we were pleased to introduce a Team Marathon Relay in 2009, where teams of up to 8 people complete the full 42K marathon.

In the first 11 years, the ***SudburyROCKS!!! Race, Run, or Walk for Diabetes***, has raised over \$500,000 for Diabetes through pledges and proceeds. Diabetes remains a serious disease – by being part of an event that provides more opportunities to stay active and healthy and raising awareness for diabetes, you become part of a growing movement to take strides to end diabetes.

Our goal every year is to increase the number of participants, while at the same time, taking strides to end diabetes by educating and raising awareness about diabetes and its consequences.
